Basket Sling Detail

Optional Selections

Notes:

1. All slings are to be metal core IWRC. Basket slings must have heavy duty thimbles.
2. Tower Equipment Co. suggest that eye hooks NOT be used at the Bridle or Basket connections. Screw pin shackles are our preference.
   A Grade 8 master link may be added at the Basket sling connection.
3. The Erector may change cable routing and wraps as required to fit field circumstances.
4. Sizes shown are minimum requirements.
